Surface Electrode
NM-315S

General

This electrode is designed for detecting signals in the evoked EMG examination.

Safety Information

⚠ WARNING	A warning alerts the user to possible injury or death associated with the use or misuse of the instrument.
⚠ CAUTION	A caution alerts the user to possible injury or problems with the instrument associated with its use or misuse such as instrument malfunction, instrument failure, damage to the instrument, or damage to other property.

Pay attention to all safety information in the Operator's Manual or Installation Guide.

> ### ⚠ WARNING
> Connect the lead tip to the specified input jack only. Otherwise, the patient could receive an electrical shock.

> ### ⚠ WARNING
> Do not use this electrode during MRI examination because it may cause skin burn on the electrode placement area.

> ### ⚠ CAUTION
> Do not attach the electrode on a wound or inflamed skin.

> ### ⚠ CAUTION
> Do not use this electrode for electric simulation.

> ### ⚠ CAUTION
> Do not store this electrode in an atmosphere with sulfur. It will deteriorate the electrode.

> ### ⚠ CAUTION
> Do not clean the electrode with hot water or chloric bleaching agent.

> ### ⚠ CAUTION
> - Do not sterilize the electrode.
> - Do not disinfect the electrode with disinfecting alcohol, cresol or glutaraldehyde.
